

IMO / MED CERTIFIED FIRE-RATED PLYWOOD FOR THE SHIPBUILDING INDUSTRY

*Innovation that
challenges flames*

Fireproofing treatment

Low carbonisation, low smoke emission and absence of flaming particles.

Fire-rated

Entire panel, even after sanding or machining.

Surface quality

Ideal for painting or coating with a decorative final finish.

Exceptional properties

Easy to machine, lightness and stability.

Sustainability

Certified fast-growing European tree farms.

Challenge the ordinary

IMO / MED CERTIFIED FIRE-RATED PLYWOOD FOR THE SHIPBUILDING INDUSTRY

Fire-rated plywood for the large shipbuilding industry modified by an innovative treatment that makes the entire panel exceptionally fire resistant, even after sanding or machining.

IMO / MED certificate that confirms its outstanding results in shipbuilding applications.

Composition based on European wood from fast-growing tree farms, with excellent physical and mechanical properties, such as ease of machining, lightness, uniformity, stability and surface quality.

Faces with natural colorations, as well as those intrinsic to the flame-retardant treatment and the frequent presence of knots. Both faces have been repaired. Ideal for covering or for raw use in applications that do not require a high aesthetic demand.

Applications:

Fireshield Marine has been specially designed for use in the construction of large passenger and cargo vessels in the shipbuilding industry, as well as other industrial vessels such as fishing boats, yachts and recreational boats.
