ALL-WEATHER PLYWOOD FOR OUTDOOR USE

Ultra-durable plywood for outdoor use modified by an innovative treatment that makes the panel exceptionally durable, even after sanding or machining.

Immune to fungal and xylophage insect attacks, even outdoors and without delamination, with a 15-year guarantee.

Exceptional surface quality, stability, lightness and ease of machining, thanks to its wood sourced from sustainably managed, fast-growing European tree farms.

Applications:

Ideal for outdoor construction projects such as façades, roof supports, cornices or doors. Also in outdoor elements such as sheds, garden furniture, signposts, DIY projects and boat equipment.

Available with decorative HPL / CPL finish with exceptional beauty and resistance to impact and scratching.

* Laminate finishes are not suitable for exterior use.

The figures included in this technical data file are for information purposes only and have no contractual value. The formats, dimensions, thickness, plies and technical characteristics may vary with no prior notification based on new developments and technological advancements. The buyer is responsible for deciding whether the Garnica product is suitable for the desired application, and will be required to ensure that the location and way in which it is used are suitable according to the manufacturer's instructions and suggestions, as well as its compliance with current regulations.

Health and safety: The user/recipient of the product is obliged to carry out risk assessments of the people whom are going to process/transform it based on the local health and safety legal requirements, implementing the necessary controls in order to provide appropriate preventive measures: e.g. manual handling, dust extraction in case of cutting/sanding, use of personal protection equipment, etc. You can request more information at info@garnica.one.
